

Contract No.: ML12091H

Purchase of and Installation of Electric Vehicle Charging Stations in Bellflower

City of Bellflower

7/18/2022

Prepared for the Mobile Source Air Pollution Review Committee (MSRC) under the AB
2766 Discretionary Fund Work Program

Acknowledgements - This project was possible due to the efforts of several key personnel that includes Bernardo Iniguez (Public Works Manager) and Steve Gose (Facilities Division Head). City staff worked with contractors to ensure the effective installation of the Electric Vehicle (EV) charging stations. This report was submitted in fulfillment of Contract No. ML12051 and EV charging stations in the City of Bellflower under the partial sponsorship of the Mobile Source Air Pollution Reduction Review Committee (MSRC). Work was completed as of 5/4/22.

Disclaimer - The statement and conclusions in this report are those of the contractor and not necessarily those of the MSRC or the South Coast Air Quality Management District (South Coast AQMD). The mention of commercial products, their sources or their uses in connection with material reported is not to be construed as either an actual or implied endorsement of such products.

Project Description & Work Performed

This project included the purchase and installation of 11 “Level II” EV charging stations. Ten of the EV charging stations were installed at the Bellflower Parking Structure located at 16337 Bellflower Boulevard. One EV charging station was installed at Simms Park located at 16614 Clark Avenue. All stations are publicly accessible

EV charging station at Simms Park

Although vehicle traffic is light at the moment, this beautiful facility represents an investment in our City's economic and architectural future," he added. "Bellflower is well-positioned and ready to continue supporting our economic resurgence post-COVID-19."

The structure features 278 free parking spaces, along with electric vehicle charging stations, a smart park system and remodeled landscaping. It will be free to park there.

The smart park system includes screens that will display available stalls at the entrance, which, according to the city, will decrease wait times for visitors shopping downtown and attending events at The Mayne Events Center and SteelCraft, both of which are across the street from the structure.

Insulin Toujeo is a long acting man made insulin used to control blood sugar in adults and children who are 6 years of age and older with [AdChoices](#) 

-Toujeo is not for use to treat diabetic ketoacidosis

-It is not known if Toujeo is safe and effective in children under 6 years of age

Important Safety Information

Do not take Toujeo if you have low blood sugar or if you are allergic to insulin or any of the ingredients in Toujeo.

Do not share your pen(s) with other people, even if the needle has been changed. You may give other people a serious infection, or get a serious infection from them.

Before starting Toujeo, tell your doctor about all your medical conditions, including if you have liver or kidney problems, if you are pregnant or planning to become pregnant, or if you are breastfeeding or planning to breastfeed.

Change (rotate) your injection sites within the area you chose with each dose to reduce your risk of getting lipodystrophy (lumps or thickened skin) and localized cutaneous amyloidosis (skin with lumps) at the injection sites. **Do not** use the same spot for each injection or inject where the skin is lumpy, thickened, lumpy, lumpy, lumpy, scaly, hard, scabbed, or damaged.

Heart failure can occur if you are taking insulin together with pills called UDs (thiazolidinediones), even if you have never had heart failure, or other heart problems. If you have heart failure, it may get worse while you take UDs with Toujeo. Your treatment with UDs and Toujeo may need to be changed or stopped by your doctor if you have new or worsening heart failure. Tell your doctor if you

Bellflower Rises to the Next Level With Grand Opening of New Parking Structure

City Meets the Needs of the Business Community By Providing Free Parking in Downtown

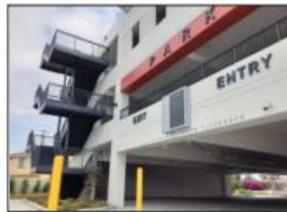

Soaring 55-ft above Bellflower Boulevard at Mayne Street on two acres of land, the Downtown Bellflower parking structure was ceremoniously opened with an official ribbon-cutting event on May 13, 2020. The new 4-level parking structure was completed over the past 18 months and features 278 free parking spaces, new landscaping, electric vehicle charging stations and a smart park system. The new parking guidance system will utilize smart-sensor technology and cameras to display available parking stalls upon entry. This feature is convenient and time-saving for visitors shopping downtown and attending events at The Mayne Events Center and SteelCraft, both located across the street from the structure.

Mayor Juan Garza cut the ribbon along with his fellow Council Members while observing the Safer-at-Home guidance. The ceremony was short and attended by Bellflower City Council and a handful of City staff.

"Despite COVID-19, we are proud to open this wonderful and historic addition to our Downtown," said Garza. "The idea to build a parking structure began in 2017, and now it is finally a reality. Although vehicle traffic is light at the moment, this beautiful facility represents an investment in our City's economic and architectural future. Bellflower is well-positioned and ready

to continue supporting our economic resurgence post-COVID-19."

For more details call Economic Development Department at (562) 804-1424 ext. 2249.
